

Klopstock

Ein Tisch ist ein Tisch ist ein Tisch.

Wirklich? Nein!

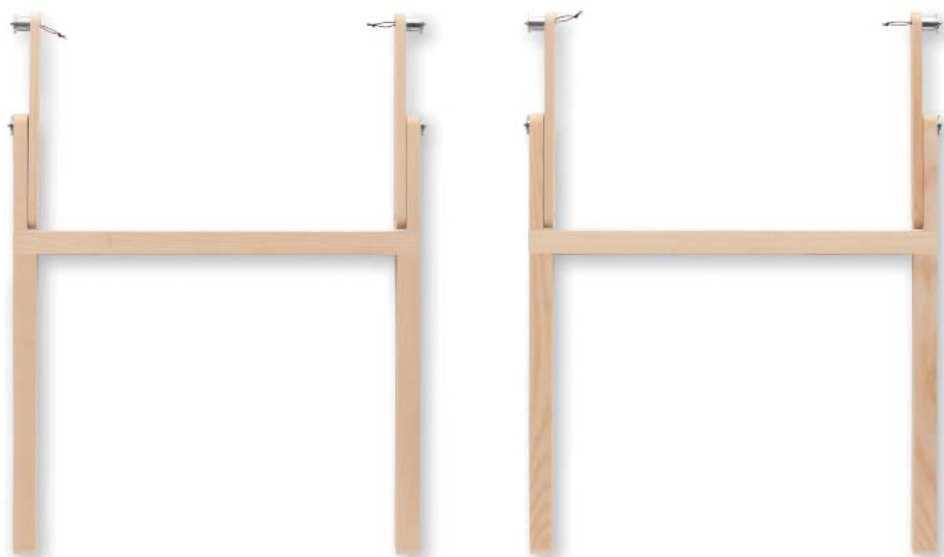

Denn der Tisch Klopstock kann etwas, was kaum ein anderer Tisch kann. Durch ein raffiniertes Klickschnappsystem können die Beine von Klopstock in 12 verschiedenen, symmetrischen (und einigen weiteren asymmetrischen) Positionen angebracht werden, je nach gewünschter Stuhl-Anordnung und Tischhöhe. Oder einfach nur, wie es am besten gefällt. Und falls sich der Geschmack ändern sollte, man mal wächst, umzieht, oder Klopstock anders nutzen möchte, baut man einfach nochmal um.

Soviel Individualität und Gestaltungsmöglichkeiten bietet wohl nur Klopstock. Es sollte also besser heißen: Ein Tisch ist viele Tische.

A table is a table, is a table!

Really? No!

For Klopstock can do what hardly any other table can. A sophisticated click and snap system enables Klopstock's legs to be positioned in 12 different symmetrical (and some more non-symmetrical) arrangements, suitable for any desired position of chairs and table heights. Or just for an arrangement you like best. In case your taste changes, you grow, you move, or you want to use Klopstock in a different way, you simply convert Klopstock once again. Most probably only Klopstock offers so much individuality and such a great number of uses. Therefore the slogan „a table is a table, is a table“ had better go „one table is many tables“.
